## Welcome to 1st Stage Home Design...

Home staging is like a new hair style for a woman, or a sharp new suit for a man. It's taking the house you've gotten used to and giving it a fresh, attractive new look — a look that will attract the interest of buyers. Since most people sell a house only two or three times in a lifetime, it makes sense to hire an experienced professional to stage your home — a professional who knows all the tricks and techniques necessary to focus the viewer's eye where you want it. In this challenging real estate market, can you afford to not have your home look its absolute best?

You have enough to worry about with the sale of your home. Let 1st Stage Home Design take the worry out of showing your home at its best. We'll highlight your home's greatest assets while downplaying the negatives so you'll get top dollar at closing. It's a service that pays for itself since staged homes sell 50% faster than unstaged homes. Let us help you make the most out of your investment.

## Our Mission

1st Stage Home Design is dedicated to creatively and economically showcasing your most valuable asset — your home.
